DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior art made of record does not teach an apparatus/method for detecting a foreign object caught in the path of a motor vehicle power window comprising a unit for comparing a target value with a predetermined threshold value and based on said comparison determining whether a foreign object has been caught and a threshold changing unit for changing the predetermined threshold when an engine-stop sensor senses that the engine in the vehicle has stopped so that the probability of said unit determining if an object has been caught is lower that when the engine is being operated. Furthermore, the prior art does not teach an apparatus for detecting if an object has been caught in the path of a window in a motor vehicle comprising a microcomputer for comparing a target value with a first threshold value when the engine of the vehicle is being operated and comparing the target value to a second threshold value during a period of time the engine is stopped to when a predetermined time elapses after the engine is stopped, and determining if an object has been caught based on said comparison.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
